

500.000 mechanical engineers make costly design mistakes daily.

**Do you know if you have flaws in your mechanical design?**

We know if you do.

Knowing the quality is first step to increased reliability.

**No one else enables any engineer to create “no fail” designs.**

You saw it first.

World premiere for RD8.

World premiere for RD8. At DEVELOP 3D LIVE; Warwick Arts Center.

World premiere for RD8. At DEVELOP 3D LIVE; Warwick Arts Center. Today.

We present RD8., a cloud-based, SaaS-based automatic “spellchecker”.

Analysis algorithm based on mistakes in 600 manual design reviews.

**Enables engineers to design better mechanical products.**

**Dimensions and tolerances reduced by 85%.**

Surface area to control reduced by 97%.

Failure rate to 0%.

RD8. scans CAD-files, identify mistakes and suggests improvements.

...in minutes.

Proven by global manufacturing companies already using RD8. Software.

The “Spellchecker” module has a kid brother.

# The “Excel Killer”.

The “Excel Killer”. A one-of-a-kind tolerance module.

Pathfinder function alone beats Excel. Ease of use alone beats the big boys.

Are you ready for a 1:1 battle with RD8. on design speed, cost and quality?

Come to Booth A14 if you are an ambitious mechanical engineer.

**Bring CAD, if you want to battle us for best design quality.**
